ABOUT US

Hobré USA is the USA branch of Hobré Instruments BV, a leading manufacturer of online analyzers, sampling systems and a system integrator. Hobré Instruments was established in 1978 in the Netherlands and is an internationally oriented and growing company serving the oil & gas, (petro)chemical, energy, steel, food & pharma Industry. With our analyzer solutions we supply to many independent companies and the majors of the industries. Through our facilities in the Netherlands, Hungary and the USA, where we design, manufacture, market and service our products, we operate in the global market. Our products are online analyzers, sampling probes, entire sampling systems and integrated systems. Our philosophy is to create the optimum combination between our customer's application requirement, existing equipment and the specific values and benefits of our technologies. For more information, please visit our website:

www.hobre.com.

Hobré USA is responsible for the US and Canadian markets. From our base in Houston we work with partners, engineering companies and end-users in the entire territory.

Hobré Instruments has established Hobré USA Inc. in Houston from where we provide sales and aftersales service, and application support for the entire US and Canadian markets.

DESCRIPTION

In this position you are responsible for the following four main tasks:

- Service and maintenance in the field on our analyzers and systems.
- Reporting and documentation.
- Technical advise to our customers and end-users.
- Remote service to our end-users and customers.
- Provide training for end-users and operators.
- Technical support to our sales team.
- In house mechanical work and testing of analyzers and systems.

Domestic and international travel will be involved. This position reports to the Manager Operations & Services of Hobré USA.

REQUIREMENTS

Technical knowledge is essential; experience with on line analyzers or similar systems is preferred. Fluent English. Other languages will be useful. Flexibility and the ability to travel internationally is a must.

Be prepared for self initiative to learn specific task related skills. Minimum work experience of around 2 years with field service work on online analyzers, sampling systems or similar equipment.

WE OFFER

A professional and pleasant international work environment. An opportunity to develop yourself and to help growing Hobré's business and organization in the US. A competitive salary. Health and pension benefits.

APPLY

If you recognize yourself in this profile and believe you have the requirements to help us grow our US presence, please send your application with a motivation via email to:

Stephan Zuijendorp, General Manager Hobré USA Inc: stephan@hobre.com

After a pre-selection candidates will be invited for an interview.

Please, do not hesitate to contact us for any further details on the job position. We also invite you to visit our website www.hobre.com where you can find further information on our company.
